

Role of the School Library Program

POSITION:

The American Association of School Librarians (AASL) supports the position that an effective school library program plays a crucial role in preparing students for informed living in an information-rich society. The school library program provides learning opportunities that enable students to become efficient, effective, and creative users of information. Further, the school library program encourages students to examine the authority of authors and the bias of sponsors; to assess the importance of currency of information to the topic at hand; to determine the scope and relevance of information to meet their needs; and to create and share new ideas, resources, products, and information. This instruction occurs best in the context of the school curriculum where students are guided by a standard of excellence set by their classroom teachers in collaboration with the school librarian.

The school library program is not confined by the school library walls, but rather, with the use of technology and online resources, connects to the community and branches throughout the entire school. The school library program provides the mechanism for students to access the resources they need 24/7, whether in the library, in the classroom, or in the student's home.

Beyond its curricular role, the effective school library program gives each individual member of the learning community a venue for exploring questions that arise out of personalized learning, individual curiosity, and personal interest. As part of the school library program, the school librarian provides leadership and instruction to both students and staff on how to use information technologies constructively, ethically, and safely. The school librarian offers expertise in accessing and evaluating information and collections of quality physical and virtual resources. In addition, the school librarian possesses dispositions that encourage broad and deep exploration of ideas and responsible use of information technologies. These attributes add value to the school community.

School library programs also provide opportunities for learners to read for enjoyment. School librarians' skills in the selection and evaluation of resources are critical in providing students, staff, and families with open, non-restricted access to a high-quality collection of reading materials that reflect personal interests and academic needs in multiple formats. School librarians take a leadership role in organizing and promoting literacy projects and events that encourage students to become lifelong learners and readers.

The school library program is based on long-range goals developed through strategic planning that reflect the mission of the school. The school librarian participates fully in all aspects of the school's instructional program, including federally mandated programs and reform efforts. The school library program provides flexible and equitable access to collections, technology, and a state-certified school librarian for all students and staff, physically as well as virtually. The collection includes materials that meet the needs of all learners, represents various points of view on current and historical issues, and offers a wide variety of interest areas. Policies, procedures, and guidelines are developed to maintain the effective school library program. The school library staff and budget are sufficient to support the school's instructional program and meet the needs of the school library program's goals.

For students, the school library represents one of America's most cherished freedoms: the freedom to speak and hear what others have to say. Students have the right to choose what they will read, view, or hear and are expected to develop the ability to think clearly, critically, and creatively about their choices, rather than allowing others to do this for them.

BACKGROUND:

Citizens of this information world must have the skills and dispositions to access information efficiently and to critically assess the sources they rely upon for decision making, problem solving, and generation of new knowledge. The effective school library program plays a critical role in schools in instructing students on how to access information efficiently and critically assess resources.

DEFINITIONS:

- **Effective School Library Program:** [Definition of Effective School Library Position Statement](#)
- **Learning Community:** A group of people (can include students) who share common academic goals and attitudes who meet regularly to share expertise and work collaboratively to improve instruction and the academic performance of students.
- **Information Technologies:** Modern information, computer, and communication technology products, services, or tools, including the Internet, computer devices and other hardware, software applications, data systems, personal electronic devices, and other electronic content (including multimedia content) and data storage.
- **School Librarian Instructional Role:** [Instructional Role of the School Librarian Position Statement](#)
- **Virtual Resources:** Resources that are not physical in nature, such as computer hardware platforms, operating systems, storage devices, computer network resources, electronic databases, and e-books.
